

Exhibition and Display Solutions

Banners stands are an ideal display for promotional messages, whether they are used for exhibitions, conferences or general point of sale. At Clip we have developed our banner systems into an innovative and exciting product base to suit all display needs.

Our in-house design, printing and production teams are on hand to help and advise you on any of our display stand or systems at anytime.

A pop up stand is a simple compact portable display stand, which turns into an impressive display within a few minutes. Lightweight and strong, pop-up displays are ideal display stands for exhibitions, presentations or as conference backdrops. The frame simply pops up and locks together, magnetic bars are then added, onto which graphic or fabric panels are located to create a seamless backdrop.
